

Organization Donor Form

MESA Vision:

To support the national science and mathematics educational agenda by ensuring that MESA students develop a high level of literacy in mathematics and science so they can play a leading role within an increasingly technology-based world.

MESA Mission:

To enable educationally disadvantaged students to prepare for and graduate from a four-year college or university with a math-based degree in engineering, the sciences, computer science, business or mathematics. Through MESA, students develop academic and leadership skills, increase educational performance, and gain confidence in their ability to compete professionally. To the extent allowed by law, MESA has particular interest in and focus on students from those groups who historically have had the lowest level of attainment in four-year and graduate level institutions.
